TOP OPPORTUNITIES

- → Reduce page weight (772 KB) — compress images, minify JS/CSS.
- → Optimise 2 slow resource(s) — lazy-load or defer non-critical assets.
- → Implement responsive CSS for mobile devices (375px breakpoint).
- → Add clear call-to-action buttons to drive engagement.
- → Fix anchor-based navigation links for better UX.
- → Resolve 24 failed network requests.
- → Cut load time from 5.90s — target under 3s.
- → Reduce 62 network requests — bundle & tree-shake.

NEXT STEPS

Let's Turn These Findings Into Results

This summary covers **25 pages** of **practice.expandtesting.com** — identifying **38 critical issues** and **85 warnings** that directly impact your search rankings, user experience, and conversion rates.
